Test Type: Teratology - Range Finding

Route: Oral Gavage

Species/Strain: Rabbit/New Zealand White

C Number:

Study Gender:

PWG Approval Date

R09: Uterine Content Summary

Test Compound: 2-((1-(4-Phenoxyphenoxy)propan-2-yl)oxy)pyridine

CAS Number: 95737-68-1

R16011C

Female

See web page for date of PWG Approval

Date Report Requested: 10/15/2019 Time Report Requested: 15:03:29

Lab: Southern Research

Test Type: Teratology - Range Finding

Route: Oral Gavage

Species/Strain: Rabbit/New Zealand White

LEGEND

Values are reported per litter as mean ± SEM (N)

Calculated values do not include non-pregnant animals, those that did not survive to terminal sacrifice, or those that delivered prior to c-section being performed.

Fetal weight endpoints and percent live male fetuses endpoints are the mean values of the litter means.

Dams that had whole litter resorptions are not included in the litter analysis.

Unsexed fetuses were included for litter size calculations but were excluded from fetal weight calculations and from the percent male calculation.

Dams where the number of implants was greater than the number of corpora lutea were assigned a percent pre-implantation loss of 0.

- * Statistically significant at P <= 0.05
- ** Statistically significant at P <= 0.01

Statistical significance for the control group indicates a significant trend test

Statistical significance for a treatment group indicates a significant pairwise test compared to the vehicle control group

- (a) Statistical analysis performed by Cochran-Armitage (trend) and Fisher Exact (pairwise) tests.
- (b) Statistical analysis performed by Jonckheere (trend) and Shirley or Dunn (pairwise) tests.
- (c) Whole litter resorptions analyzed by Cochran-Armitage (trend) and Fisher Exact (pairwise) tests. All "per litter" and implantation loss endpoints analyzed by Jonckheere (trend) and Shirley or Dunn (pairwise) tests.
- (d) Statistical analysis performed by Jonckheere (trend) and Williams or Dunnett (pairwise) tests.
- (e) Litter weights adjusted for litter size. Statistical analysis performed by Jonckheere (trend) and Williams or Dunnett (pairwise) tests.
- (f) Statistical analysis performed by Jonckheere (trend) and Williams or Dunnett (pairwise) tests.

All Cochran-Arnitage (trend) and Fisher Exact (pairwise) are reported as two-sided tests.

All animals in the 400 mg/kg and 500 mg/kg groups were euthanized during gestation due to excessive toxicity.

NR not recorded
